

Jesús Caín Gutiérrez Higuera

Computer Systems Engineer

Professional Profile

Computer Systems Engineer with experience in data analysis, logistics, operational control, inventory management and process optimization. Experienced using Key Performance Indicators (KPI), Enterprise Resource Planning (ERP) systems and modern technologies to improve administrative and logistics operations.

Technical Skills

C++ • SQL • Python • Linux • Bash Scripting • Docker • Git/GitHub • Node.js • Next.js • Windows Server • Cisco • Vercel • Supabase

Professional Experience

Head of Logistics — Maniobra de Precisión (2024-2026)

Coordinated industrial machinery logistics nationwide across Mexico and the United States, including route scheduling, operational tracking, documentation control and delivery supervision.

Administrative Monitoring and Control — Grupo ESD (2023-2024)

Managed administrative monitoring through data analysis and Key Performance Indicators (KPI), improving inventory control and operational efficiency.

Inventory Manager / Auditor — Princo (2016-2023)

Managed multiple warehouses using Enterprise Resource Planning (ERP) systems, operational audits, inventory control and logistics analysis.

Warehouse and Purchasing — Sukarne (2015-2016)

Handled inventory management, purchasing operations and logistics optimization within warehouse and production areas.

Call Center Supervisor — Z Gas (2012-2014)

Supervised personnel and customer service operations through KPI monitoring and operational process optimization.

Personal Project — Kalan

Modern web project developed with Next.js and deployed on Vercel. Focused on responsive design, frontend development and modern visual experience.

Education

Computer Systems Engineering — Swiss University ISU
