Portfolio: mi-curriculum-phi.vercel.app

Project: kalan-chi.vercel.app

Professional Summary

Technology-oriented professional with extensive experience in operations, logistics environments, technical coordination, KPI monitoring, infrastructure support, and process optimization. Currently pursuing a Bachelor's Degree in Computer Systems Engineering while developing modern technology solutions using Next.js, React, TypeScript, GitHub, and Vercel. Recognized for strong problem-solving skills, adaptability, operational leadership, technical learning, and continuous improvement within high-demand environments. Focused on building a professional career in IT Operations, Infrastructure, Technical Support, and Systems Engineering.

Technical Skills

- Linux Administration
- Networking & Infrastructure
- Technical Support
- Next.js & React
- TypeScript
- Git & GitHub
- Docker Fundamentals
- Responsive Web Development
- IT Operations
- KPI Monitoring
- Data Analysis
- Process Optimization
- Inventory & Logistics Systems
- Vercel Deployment
- Windows Environments
- Problem Solving

Professional Experience

Operations & Infrastructure Support — Grupo ESD / Grupo LAMD

March 2023 – November 2024

- Supported operations and infrastructure-related activities within logistics and industrial environments.
- Monitored KPI metrics, workflow efficiency, operational continuity, and service quality indicators.
- Participated in process optimization initiatives focused on improving operational response times.
- Coordinated operational reporting, inventory tracking, and systems-related support activities.
- Collaborated with multidisciplinary teams to improve productivity and operational reliability.
- Strengthened analytical, technical coordination, and troubleshooting capabilities.

Industrial Operations & Technical Support — PRINCO (Equipo Industrial del Noroeste)

February 2017 – February 2023

- Provided operational and technical support within industrial and logistics environments.
- Assisted with systems-related processes, reporting activities, workflow tracking, and inventory coordination.
- Participated in operational standardization and continuous improvement initiatives.
- Developed strong adaptability in high-demand operational environments.
- Supported coordination between teams to maintain operational continuity and efficiency.
- Improved problem-solving and analytical skills while working with operational data and logistics processes.

Operations Coordinator — Z Gas (Compañía de Gas de Tijuana)

March 2014 – June 2015

- Participated in operational supervision and customer service coordination activities.
- Monitored KPI indicators and workflow performance metrics.
- Supported reporting, operational analysis, and process improvement initiatives.
- Contributed to improving operational efficiency and response times.

Technology & Innovation Support — UDRONES Robotics Creations

July 2012 – October 2013

- Participated in innovation and technology-oriented projects.
- Supported operational coordination and technology-related activities.
- Strengthened interest in systems engineering, robotics, and digital technologies.

Projects

KALAN — Modern Infrastructure & Technology Platform

Designed and developed a modern bilingual web platform focused on infrastructure, responsive design, technology services, scalability, and professional digital presence using Next.js, React, TypeScript, GitHub, and Vercel.

Professional Portfolio Website

Created and deployed a recruiter-oriented bilingual portfolio featuring responsive UI, project showcase, certificate integration, and modern technology branding.

Recognition & Conferences

Recognized participant and presenter during Tijuana Innovadora 2012 within the Organizational Excellence panel. Contributed to the conference: 'How to Win the National Quality Award: Designing an Innovative Business Model.' Recognized alongside Raúl Montoya, Oscar Núñez, and Guillermo Romero during one of Baja California's most important innovation forums.

Certifications

- Linux Unhatched — Cisco Networking Academy
- Python Programming Fundamentals
- Docker Foundations / Docker en Acción

Education

Bachelor's Degree in Computer Systems Engineering — ISU Universidad

Focused on software development, databases, artificial intelligence, networking, cybersecurity, systems infrastructure, mobile applications, and digital transformation.
